

# SUPPLY CHAIN SUSTAINABILITY

Choose the Right Supplier,  
Be the Right Supplier

## Programme Overview

This programme provides an introduction to sustainability within supply chains, covering both procurement and supplier perspectives. It includes an overview of global and regional sustainability developments, and practical guidance on integrating Environmental, Social and Governance (ESG) considerations into business practices. Participants will also be introduced to sustainability reporting frameworks and tools to support their reporting journey.

## Participants will be equipped with the knowledge and tools to:

- Understand key sustainability trends and concepts relevant to supply chains
- Identify and assess ESG risks and opportunities
- Apply ESG considerations in procurement and operational processes
- Support initial steps in sustainability measurement and reporting

## Programme Structure

The programme is delivered through lectures, discussions and practical exercises. Topics covered include:

1. Introduction to sustainability and the Sustainable Development Goals (SDGs)
2. Sustainable procurement and integrating Environmental, Social, and Governance (ESG) principles into purchasing
3. Materiality assessment and strategy development
4. Environmental considerations (E), including nature-related topics
5. Social considerations (S) within the value chain
6. Governance (G) and business ethics
7. Introduction to sustainability reporting

## Key Outcomes

### For Buyers:

- Make more informed, sustainability-driven supplier selection decisions
- Strengthen supply chain resilience and accountability

### For Suppliers:

- Integrate ESG principles into your operations
- Enhance your business credentials and competitiveness
